

Homework 16

1. Setup an account on NFT Storage.
2. Upload an image and then associate this image with one of your Volcano NFTs. Think about a way of automating image generation.
3. In the NFT Metadata - set some attributes/traits which can be viewed on OpenSea.
[Example](#)
4. See if you can figure out how to store the NFT Metadata on chain within your NFT Contract. Hint look into the [Base64]
[<https://github.com/Brechtpd/base64/blob/main/base64.sol>] library. [Example](#)
